

Step - 1:

Download and Install Virtualbox

<https://www.virtualbox.org/wiki/Downloads>

Step - 2:

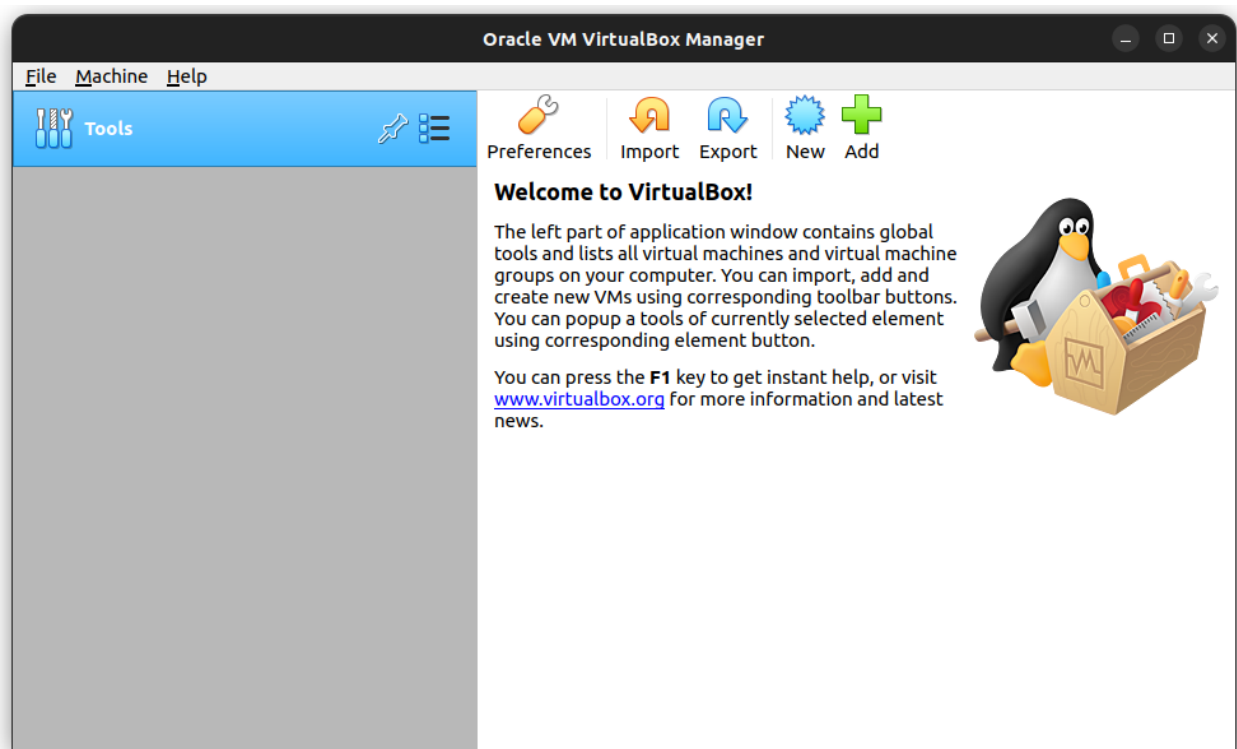

Download the Lab OVA File.

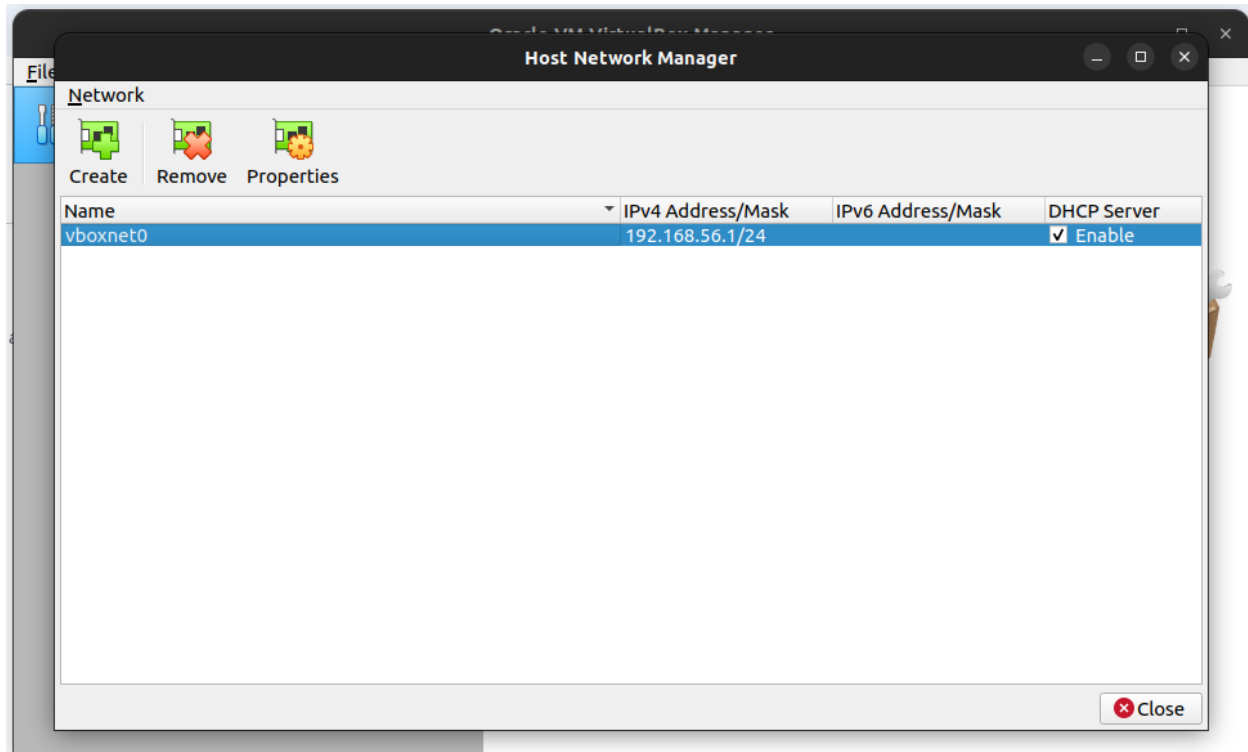

https://drive.google.com/drive/u/1/folders/1j7-WMJlU_xghXpYDEuCcJXov5RRfg1Ov

Step - 3:

In Virtual Box create an Network.

File > Host Network Manager > Create

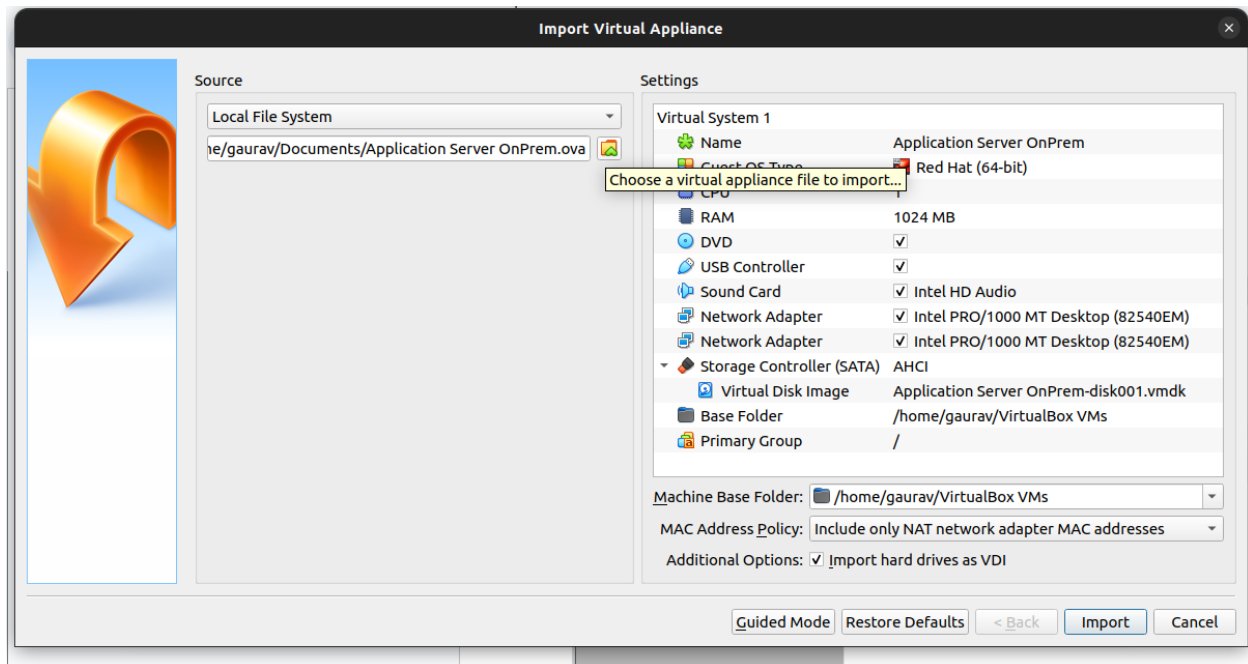

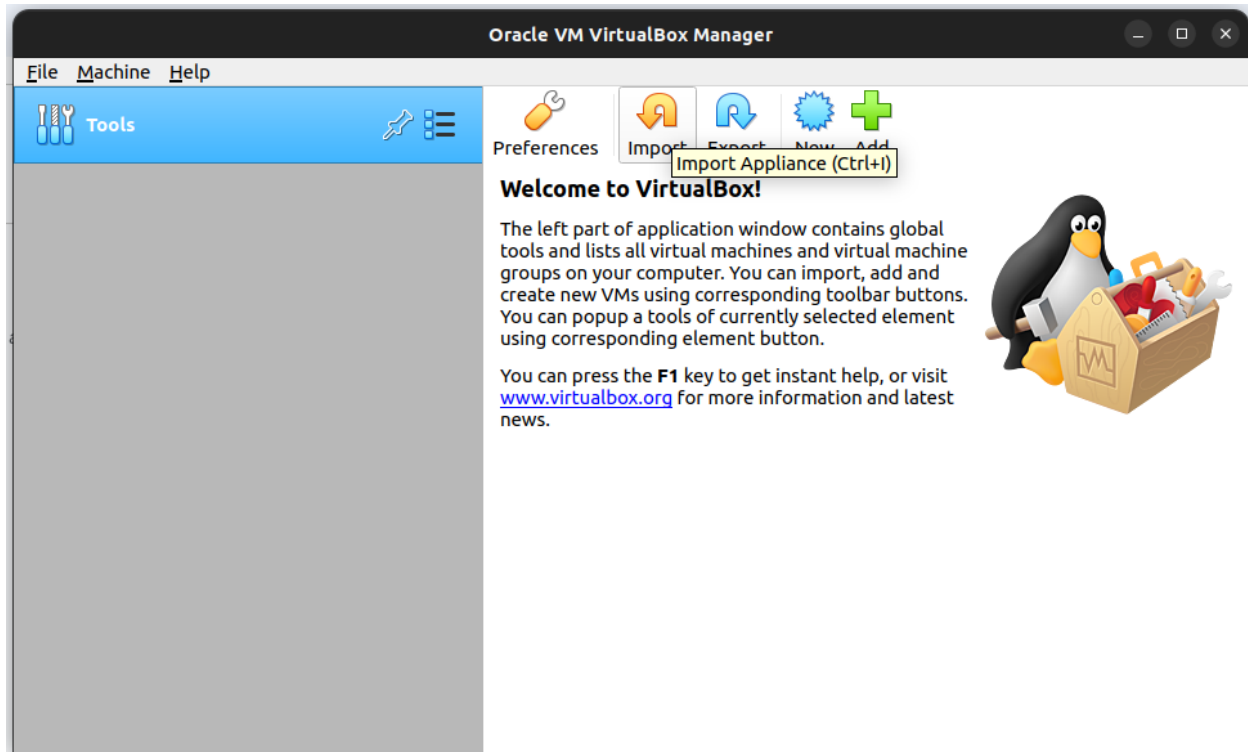

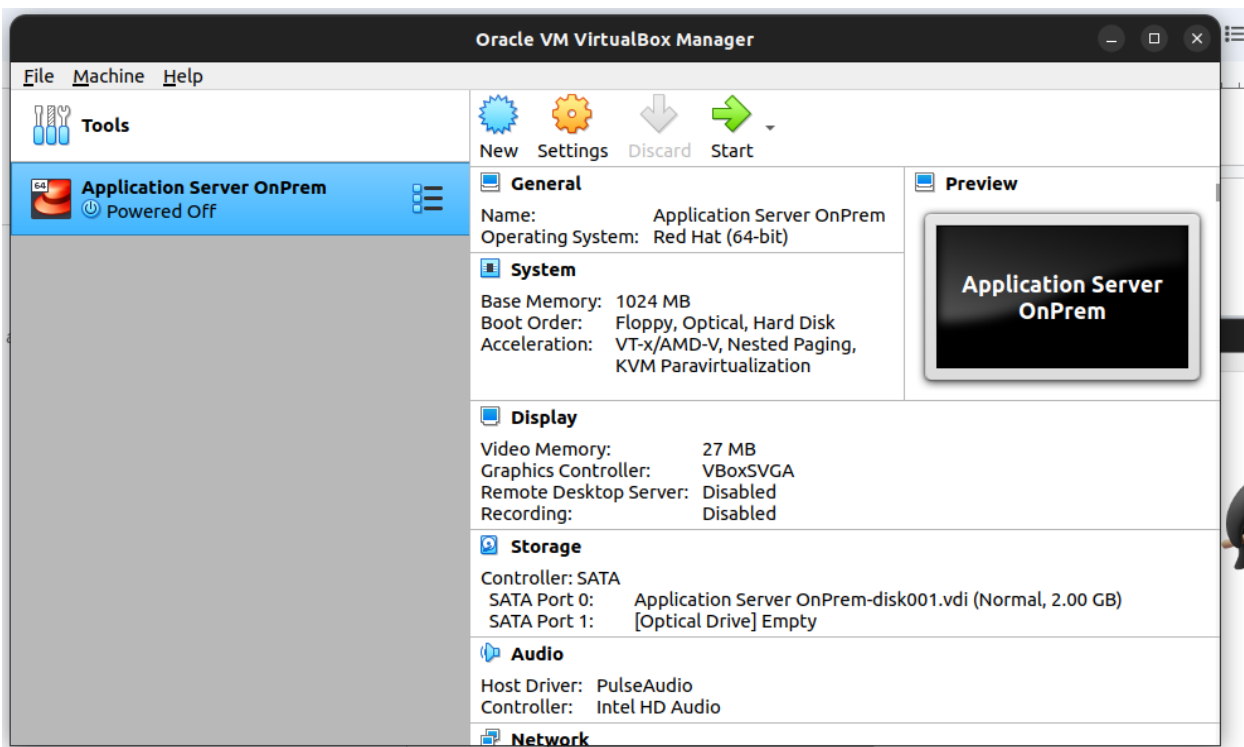

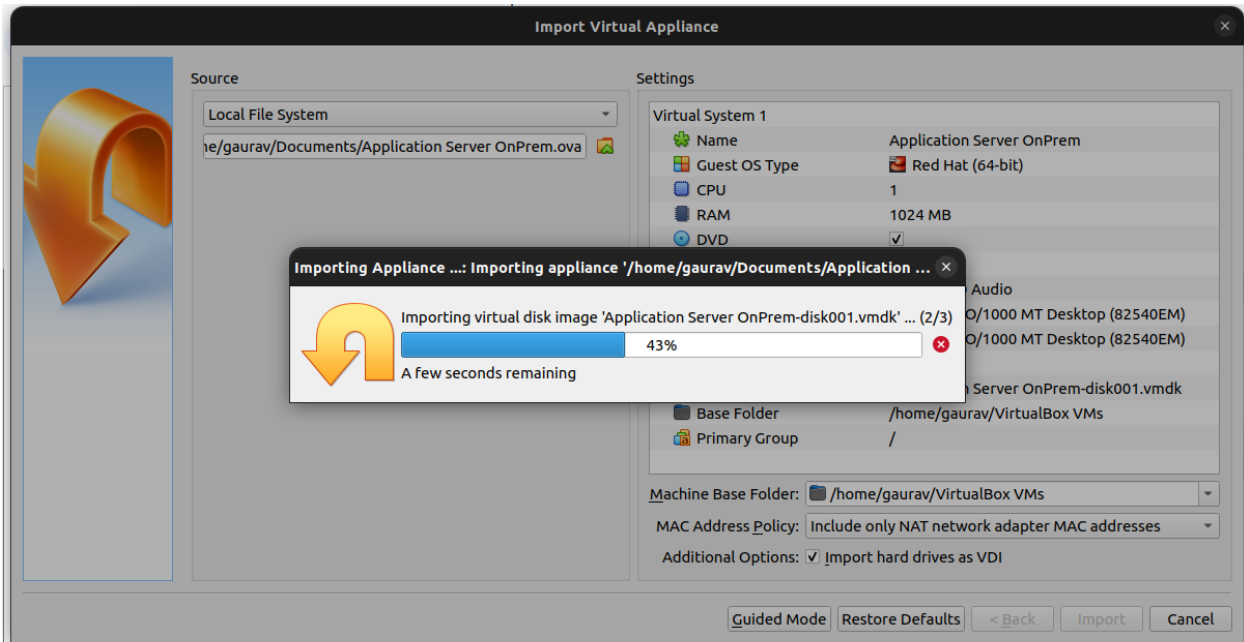

Step - 4:

Import the OVA file downloaded in Step - 2

- 1) Click on Import Appliance.
- 2) Choose the downloaded ova file and then click on Import.

Step - 6:

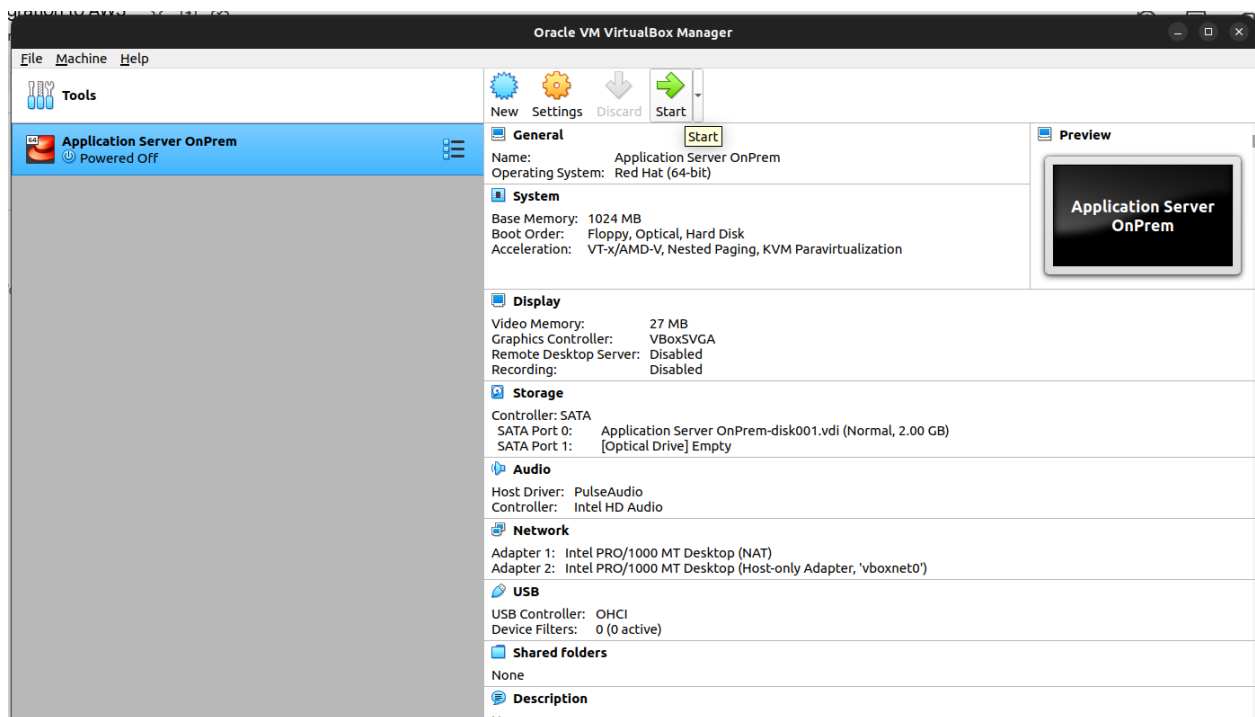

Start the VM.

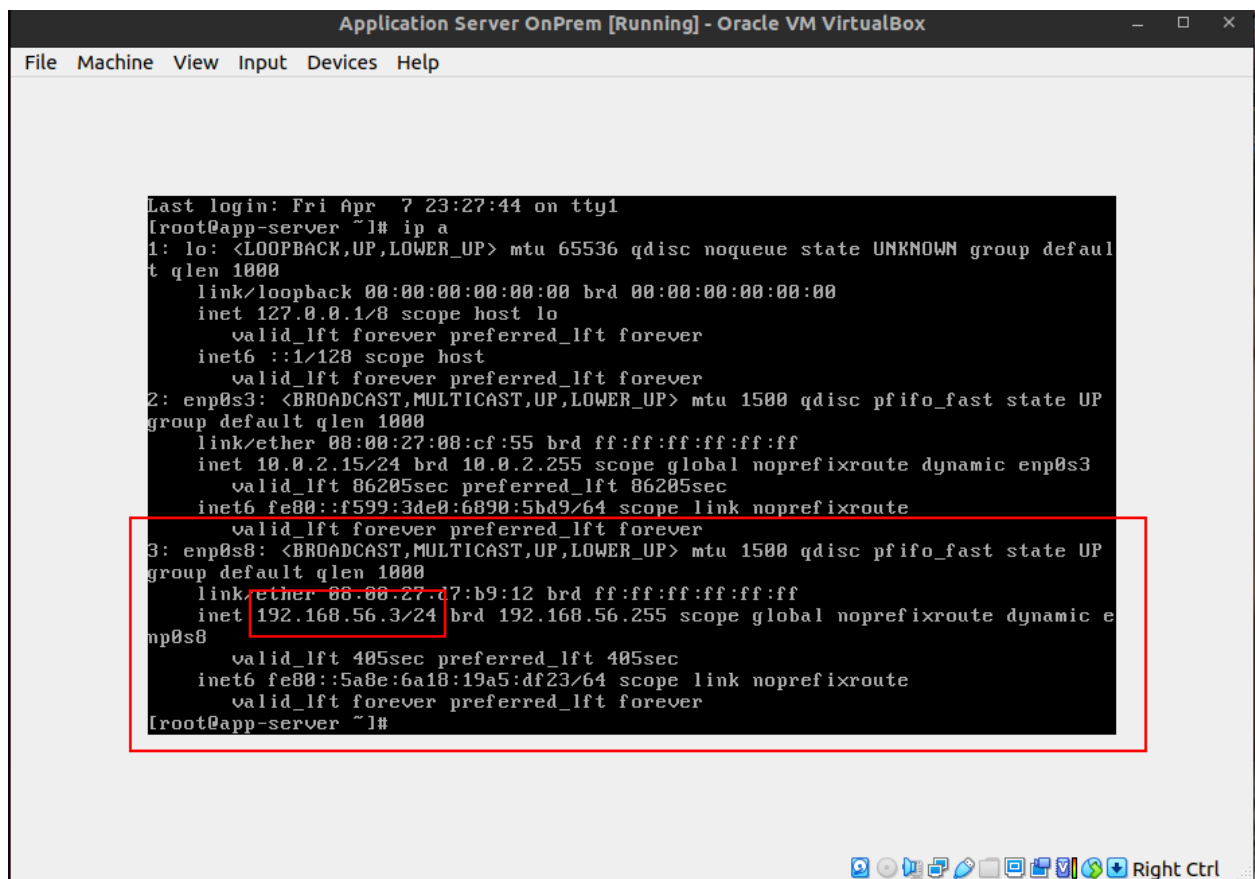

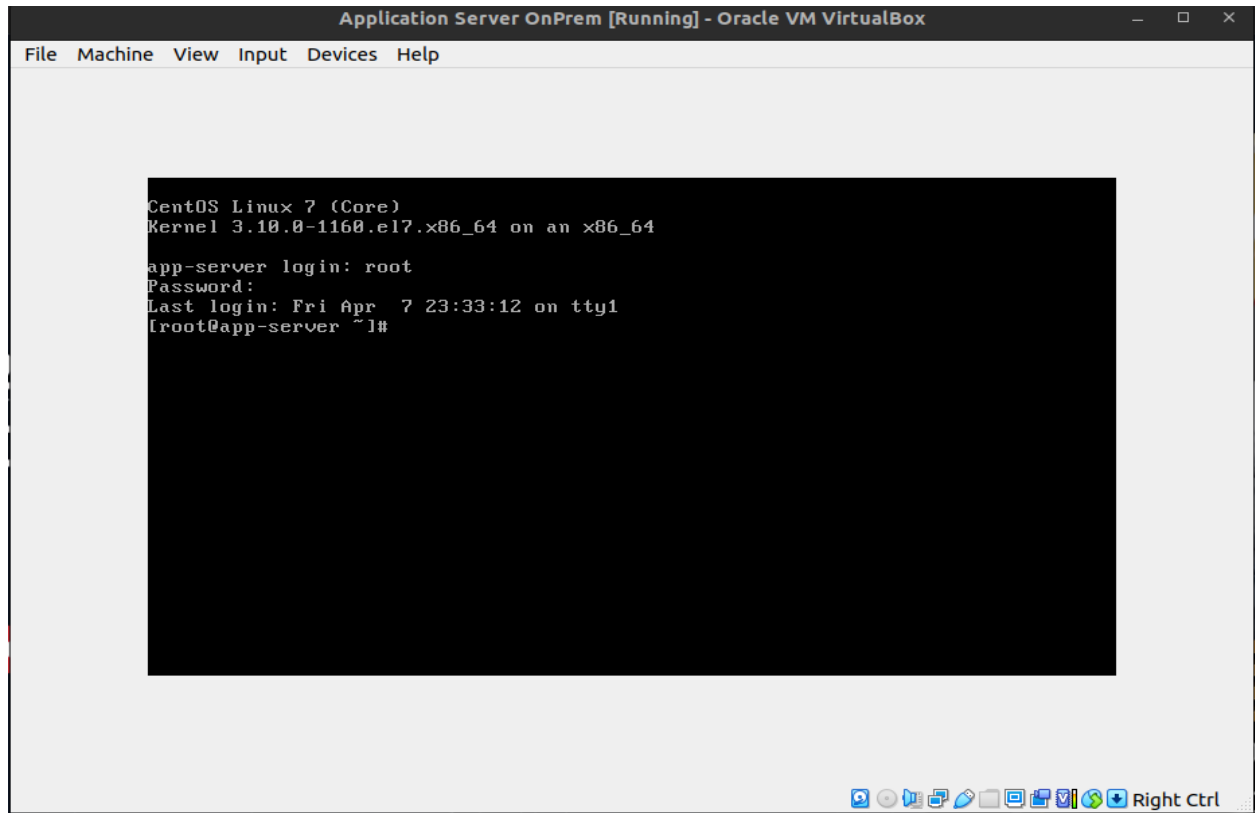

The VM has a Application Running to access the application login to VM and get the VM IP.

Username - root

Password - redhat

After Login to the server run “ip a” command and you will see two ip address on the VM. the second IP address is the external IP through which you will be able to access the application.

Access the Application on the browser by the VM IP.
